Objective:

Experienced Technology Solutions Specialist with a strong background in software engineering, systems administration, project management, and ERP development. Proven track record of revitalizing technology infrastructure, implementing cost-effective solutions, and delivering results in challenging environments. Seeking opportunities to apply my expertise and drive for innovation.

Professional Experience:

Morgan Cycle Supply & Service

Location: Winnipeg, Manitoba

ERP Project Manager/Lead Developer

August 2022 to June 2023

- Led the development of a greenfield ERP project to streamline inventory management, ordering processes, and e-commerce functionality, resulting in an increase in operational efficiency.
- Collaborated with stakeholders to define project requirements and milestones, ensuring alignment with business objectives.
- Designed and implemented ERP modules, enhancing operational efficiency and data accuracy.
- Oversaw the integration of e-commerce features, allowing for seamless online product ordering.
- Conducted user training and provided ongoing support, optimizing system usage and enhancing team productivity.

Yetman's Ltd

Location: City, Manitoba

Technology Solutions Specialist

August 2019 to July 2022

- Spearheaded the modernization and maintenance of an outdated ERP system, implementing critical updates and new features, resulting in a reduction in system errors.
- Managed hardware and server infrastructure, overseeing upgrades and system maintenance.
- Led strategic planning and execution for technology projects, including website integration and hardware upgrades.
- Addressed complex technical challenges, such as data recovery and email server transitions.
- Coordinated the relocation of IT infrastructure during the company's move to a new location.
- Assumed a multifaceted role that included software engineering, systems administration, and project management.

Freelance Work

Location: City, Manitoba

Freelance Software Engineer

2016 to 2019

- Undertook various freelance projects for diverse clients, delivering customized software solutions tailored to their specific needs.
- Collaborated closely with clients to define project scopes, goals, and timelines.

- Developed, tested, and deployed software applications, meeting or exceeding client expectations.
- Successfully managed multiple projects simultaneously, demonstrating strong organizational and multitasking skills.
- Maintained ongoing communication with clients to address inquiries, provide updates, and ensure client satisfaction.

Education:

- Completed high school at R.B. Russel (Winnipeg, Manitoba).
- Level 3 automotive technician apprenticeship at Red River College.
- Self-taught and passionate learner, participated in numerous Udemy courses to enhance technical skills.
